

# Infor SyteLine Workbench Suite

## Stop firefighting.

When you're busy fighting fires every day at work, it's easy to overlook the critical information that helps avoid the crises that make all that firefighting necessary.

Collecting more information isn't the answer; you know that. Your email inbox collects more useless information in a day than you ever need, and you're no better off for it. When you have the right information in the right place at the right time, you'll have time to manage better because you're not so busy fighting fires.

Get all the information you need—when you need it—with Infor™ SyteLine Workbench Suite.

## Leverage experience.

You instantly gain decades of experience when you use Infor SyteLine. Our team of experts has spent over 25 years helping companies like yours work smarter and get more done with the resources you already have. That experience is “baked into” SyteLine. You can make your business more agile, responsive, and ready for tomorrow's challenges by making the most of SyteLine today.

## Get it all right: information, place, time.

Arm your employees with the exact information they need to successfully accomplish their work with Infor SyteLine Workbench Suite. You'll get a single, consolidated screen that pulls together the data that matters most and organizes it for quick, effective action.

You'll also get customized home screens for each person, featuring consolidated performance gauges, navigation shortcuts, process flows, and advanced report tools in one convenient location so that everyone can work faster and get better results.

**Get more done by focusing on the big picture and polishing off the details with Infor SyteLine Workbench Suite.**

Whether you're a C-level officer monitoring strategic company-wide KPIs or a billing manager who needs to streamline invoicing for better cash flow, Workbench gives you quick, timesaving access to data and connects you to supporting layers of related data. You'll increase productivity, provide valuable role-related feedback, and support each employee's problem-solving efforts. Take advantage of a range of role-based Workbenches, including:

- Customer Order Workbench
- Customer Service Workbench
- Item Workbench
- Inventory Workbench
- Job Workbench
- Partner Workbench
- Project Workbench
- Purchasing Workbench
- Service Management Workbench
- Unit Workbench

You'll start getting ahead of the issues that can make your business more successful because Workbench lets you monitor performance indicators and influencers as often as you want, whether it's minute-by-minute, hourly, daily, or weekly. You'll also get connected to your live, integrated SyteLine database, not just a static snapshot, with easy, right-click access to deeper layers of source data. That helps you get to the root of potential problems before they escalate into crises that force you back into firefighting.

## Get more done.

In an age when information drives nearly every business decision, you can save lots of time by using a tool that consolidates all the information you need and puts it in one place. You'll not only get more done, but you'll gain peace of mind, knowing that you really have your business under control. You always know what you need to do next with Infor SyteLine Workbench Suite.
