

Infor Factory Track Warehouse Mobility

Achieve end-to-end efficiency

Infor® CloudSuite Industrial (SyteLine) customers can now take advantage of cloud-based, mobile technology to make your whole material inventory and handling process faster and far more accurate. Infor Factory Track Warehouse Mobility™ combines reliable barcode scanning technology with convenient mobile device support and the rich capabilities of Infor CloudSuite Industrial (SyteLine) to extend processing power out to the shipping docks and warehouse spaces where the material actually resides to improve overall performance.

Join an experienced partner

Infor brings you expertise that extends through every aspect of your manufacturing operations—from sourcing to operations to distribution. Our portfolio of advanced business solutions, including Infor CloudSuite Industrial (SyteLine), will help you deal effectively with your everyday challenges. With innovative Infor technologies, including the Infor Mongoose platform, you can enhance the capabilities of our proven solutions by making every application ready to connect seamlessly with the systems you use most often, so that you can get better results quickly.

Upgrade for better performance

You can extend the rich capabilities of Infor CloudSuite Industrial (SyteLine)—and add powerful, cloud-based mobile access and reliable barcode scanning features—with the help of Infor CloudSuite Industrial (SyteLine). Infor Warehouse Mobility is a complete, browser-based HTML5 solution built on the modern Infor Mongoose development framework that will help you automate a perfectly fitted, cloud-based data collection system for your shop floor. Best of all, Infor Warehouse Mobility is accessible through familiar tablet and smartphone technologies on a touch-friendly interface.

It offers advanced capabilities for container-based inventory management and labor tracking as well. With a zero-footprint deployment, requiring no software downloads to your devices, its rich connections to your CloudSuite Industrial (SyteLine) solution help you improve:

- **Inbound logistics**—Accelerate material movement, improve putaway, and gain more timely, accurate information about purchase receipts and transfer receipts.
- **Inventory movements**—Optimize workflows and streamline cycle counting, stock moves, quantity adjustment, and more.
- **Shop floor activities**—Automate purchasing and establish a realistic safety stock level to optimize job material issue, WIP moves, and other key transactions.
- **Shipping**—Consolidate multi-step processes with Infor Warehouse Mobility's built-in workflow capabilities to enhance all aspects of pick, pack, and ship operations.

You'll get the benefit of a seamless connection between your Infor SyteLine solution and Infor Factory Track Warehouse Mobility, which means you'll have complete visibility over your entire operation. In addition, you'll gain the ability to take prompt action in response to unexpected situations such as late deliveries, short shipments, or rush orders.

Infor Warehouse Mobility enhances the power of Infor SyteLine to help you achieve:

- **Faster receiving and putaway**—By using mobile barcode reading at the point of receipt, you'll have instant awareness of every piece of material you receive.
- **More efficient inventory movement**—Every time material moves, that movement can be tracked as it happens. Supervisors can also exchange messages with workers in the warehouse via Infor Warehouse Mobility to resolve discrepancies as they arise, i.e. misplaced items, changed orders, substitutions, etc.

- **Better shop floor control and labor data**—Infor Warehouse Mobility connects you with a growing range of capabilities, including time and attendance solutions, paperless shop floor data collection, and more.
- **More accurate order fulfillment including pick, pack and ship**—When warehouse employees have access to more timely, accurate orders, accuracy improves significantly.

You also gain the power to configure Infor Factory Track Warehouse Mobility to suit your exact requirements, and reconfigure it quickly and easily as your requirements change.

Get better results

The flexibility and sophistication of Infor Factory Track Warehouse Mobility will help you run your organization as a cohesive whole, rather than as a collection of unconnected parts. You'll also gain a whole new level of insight into the complex balance between the various inventory-related activities that drive your overall efficiency. As a result, you'll be ready to perform better, improve workflow, and get better results.

Extend the power of CloudSuite Industrial (SyteLine) out to your shipping docks and warehouse spaces where the material actually resides to improve overall performance.
