About the company

Moeller Manufacturing Company - Aerospace Division is a manufacturing facility specializing in machined parts for the gas turbine aircraft engine and power generation industries.

Moeller Products are found on virtually every commercial and military aircraft operated in the United States, and numerous other fleets worldwide. Our management’s values are demonstrated by a history of over 65 years of investing in the right people, reinvesting in the business, and servicing our customers with honesty and integrity. Our ownership and management is committed to foster these same values in our employees so they will continue this tradition and ensure our success in the future.

Challenges

- Previous system was dated and unsupported
- Bad data and instability were plaguing the business processes
- Manual processes were being executed outside the ERP system
- Lack of visibility was creating many problems throughout the organization

Benefits

- After implementation, management had real-time visibility into transactions
- Reports generate almost instantly, versus the 5+ hours they previously took to generate
- Close process time was reduced dramatically
- One full time person was doing time cards previously, that individual has now shifted to focus on other critical tasks
- AR aging used to take hours, now it only takes seconds

“AR aging takes seconds where it used to take hours, there are a thousand things like that. SyteLine is easy to use and it’s fast!”

— Justin Smith,
Controller, Moeller Aerospace
